

**DAV Rohini in solidarity with the
Delhi Government's cause of stop
purchasing & bursting
crackers this festive season**

Let us check the facts

- 1. Delhi faces grave air pollution particularly in the winter season and levels of pollutants go much beyond the prescribed standards for ambient air quality**
- 2. There is a possibility of another surge of COVID-19 infections and large-scale celebrations by the bursting of firecrackers will result not only in agglomeration of people hence a violation of the social distancing norms but also would result in higher levels of air pollution leading to serious health issues**

3. Under the prevalent pandemic crisis situation air pollution would lead cause serious health issues to people recovering from COVID-19 and other respiratory ailments

4 Bursting of firecrackers releases metal particles, dangerous toxins, harmful chemicals, and noxious gases which would deteriorate the air quality further. Poor air quality may cause respiratory disorders even to healthy people and severe health impacts to people with lungs and heart diseases

5 There will be a total ban till 1 January 2022 on the sales and use of all kinds of firecrackers in the NCR and all the cities in the country. So let us say no to crackers, as crackers are of no use, they are just environmental abuse.

Team DAV Rohini.
