

Dear parents,

Eco Brigade of Rohini DAV is taking small but firm steps to make our Earth clean and green. **E-bin is placed in the school premises for a week**, in collaboration with project Srijan- initiative of Shahid Sukhdev Singh College of Business Studies, Delhi University. The School has taken up this green initiative. You can be the part of this drive by **sending all electronic waste for responsible recycling**. Electronic waste or e-waste describes discarded electrical or electronic devices. **List of electronic waste to be sent is attached**. You can ask your neighbours also to participate in this e waste collection drive.

- The e-waste sent should be wrapped in a newspaper.
- It should be the name of the student, Class Section and approximate weight of the waste brought.
- Don't send the waste in plastic bags as we strictly prohibit the use of plastic in school premises.
- **Students bringing maximum e-waste will be presented with certificates.**

Your cooperation will make this drive successful and save our Earth from pollution. Landfills cannot help with recycling e-waste. When disposed off improperly, plastic, glass and heavy metals present in e-waste not only lead to air and soil pollution, but even seeps into water bodies and become one of the primary reasons behind marine impurity. So, avoid throwing e-waste in your garbage bins and adhere to smart electronic technology recycling methods.
